Fandom is the leading online platform for fan-created content on games, movies, and TV. I worked as a contractor on the Anime Wiki team, where I created and maintained wikis, and built communities within the Anime vertical. Key accomplishments:

- Created a wiki for the Anime Wiki team's resources
- Introduced new organizational practices to the team such as taking meeting minutes

GAME DESIGNER * FREELANCE * NOVEMBER 2019 - PRESENT

I create tabletop RPG supplements for the Hero System, including custom settings, worlds, adventures, and magic systems, graphs, and statistic systems. A full list of these supplements can be found [here](#).

I compose, record, and produce music. Listen to samples via [CDBaby](#), [Landr](#), or [YouTube](#).

I write both [original works](#) and [fan stories](#) as Wikikinetic.

VOLUNTEER EXPERIENCE OR LEADERSHIP

WIKIPEDIA * JANUARY 2017-PRESENT

I made over 3000 edits to over 1000 pages on Wikipedia, all under my real name.

Key accomplishments:

- Maintained the page for the chart-topping Indian TV series Naagin, which I edited to a high standard of quality for 1 year
- Contributed many graphical assets to the site as part of a project dedicated to this effort
- Copyedited hundreds of pages, some as part of a multi-user copyediting project and some on my own recognizance

FANDOM * JULY 2017-PRESENT

I created, managed, and heavily contributed to various Fandom wikis on topics that interest me. Key accomplishments:

- Created two wikis—one for 2018 Game of the Year Celeste—and maintained those wikis for 2 years
- Combined several inactive communities on the same topic—each with no userbase to speak of—into a single flourishing community with over 100 members
